

# Centennial College

## Final Test-Hands ON

### Instructions:

**Be sure to read the following general instructions carefully:**

- This Assignment should be completed individually by all the students.
- You must submit the following in the assignment **drop box**:
  - a. Zipped folder containing all your solution files
- You will be asked to demo your solution in-person.
- Failure to demo in-person might result in a grade of zero.

### Academic Integrity

- **PLAGIARISM** is an Academic Offence
- Doesn't help you learn the course material
- Giant waste of your time and mine
- Causes mark penalties and transcript annotations

## flex-example.html 50%

1. Select 5 image files.
2. Display all the five images in a flexbox to demo the justify-content property.
3. There should be five rows, whereby each row demos one of the justify-content formats. Hint: put each row in a container [ Use div] and style it accordingly.
  - a. The extra space along the main axis should be displayed in flex-start format **10%**
  - b. The extra space along the main axis should be displayed in flex-end format **10%**
  - c. The extra space along the main axis should be displayed in center format **10%**
  - d. The extra space along the main axis should be displayed in space-between format **10%**
  - e. The extra space along the main axis should be displayed in space-around format **10%**
4. All five images should be used in each row.
