

Software Engineering Research Conference 2023 (Online)

Presentation Schedule

April 5 & 6, 2023

Overview

An **online** research conference will be held on April 5 & 6, 2023 to allow students to present their research work. Students will be given a maximum of two minutes to present their work and a maximum of two minutes to answer questions and receive feedback.

Students are asked to prepare a one-page poster using PowerPoint which includes the: paper title, presenter's name, presenter's institution (The University of the West Indies, Cave Hill Campus), name of the conference (Software Engineering Research Conference 2023), conference date (April 5 & 6, 2023), research motivation, problem description, research purpose/objectives, significance of research, background literature, methodology (including the research question(s)), results, conclusions and references.

Given that the poster needs to be created on a single page, students are advised to focus on the main idea that they wish to convey. Also, students should limit the amount of text they use in the poster; rather, they should use images, diagrams, charts, graphs and tables.

The website at <https://ugs.utexas.edu/our/poster/samples> provides poster samples and a discussion on what makes a good poster, which you might find useful.

Presentation Schedule

Student presentations will be held in the following order. Please be prepared to share your screen and give your presentation when called upon. It is important to remember that you only have two minutes to present and two minutes for questions/feedback.

Presentations will begin at 10 minutes past the hour, therefore it is essential for students to be logged on and ready to present.
